Abdullah Al Mahdi

Junior Front-End Developer

Damascus, Syria | abdallahalmahdi12@gmail.com

GitHub | LinkedIn | Portfolio

SUMMARY

Front-end developer working with React, Next.js, and TypeScript. Freelance experience since 2023 building landing pages and UI prototypes. Interested in responsive interfaces, animation, and 3D interaction; completing a Bachelor of Information Technology and seeking a junior front-end or software engineering role.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript (ES6+), TypeScript

Front end: React, Next.js, Tailwind CSS, GSAP, Framer Motion, Three.js / WebGL basics, Rive integration

Tools and practices: Git, GitHub, npm, Vite, responsive design, cross-browser compatibility, web performance, Figma (reading designs)

SELECTED PROJECTS

abd-studio | Live

Educational recreation of Kargul Studio | Next.js, React, TypeScript, Tailwind CSS, Framer Motion, Rive

- Implemented responsive pages, a category-filtered gallery with keyboard navigation and zoom, an FAQ accordion, and a testimonial carousel.
- Integrated lazy-loaded Rive animations with local WASM and static reduced-motion/error fallbacks. Original design and creative direction belong to Kargul Studio; not client work.

Apple iPhone 3D Showcase | Live

Tutorial-based implementation | React, GSAP, Three.js, React Three Fiber, Drei, Tailwind CSS

- Connected React state to a rotatable iPhone model with finish and size controls; coordinated transitions and video-carousel progress with GSAP.

Brain Wave - SaaS Landing Page | Live

Tutorial-based implementation | React, Tailwind CSS, React Just Parallax

- Built reusable landing-page sections and mobile navigation with background scroll locking; respected reduced motion in hero parallax. Presentation only, without an AI backend.

HooBank - Financial Platform UI | Live

Learning implementation | React, Tailwind CSS, Vite

- Built reusable sections from shared content data, a mobile menu, and responsive layouts with a custom Tailwind theme. Sample financial content, not a banking service or original design claim.

Aurum Villas (bespoke)

Marketing-site prototype | Next.js, React, TypeScript, Tailwind CSS, React Hook Form, Zod

- Implemented data-driven villa detail routes, URL-backed collection filters, and local contact-form validation. The form does not deliver inquiries.

EXPERIENCE

Freelance Front-End Developer | Self-Employed

2023 - Present | Remote

- Built responsive landing pages and UI prototypes for small businesses and student projects.
- Discussed requirements, revised interfaces based on feedback, and documented project setup using Git and GitHub.

EDUCATION

Syrian Virtual University | Bachelor of Information Technology (BAIT)

Fourth year | Expected graduation: 2026 / 2027

LANGUAGES

Arabic: Native | English: B1 (Intermediate)
